Total Subscribers

10,000

Active Subscribers

4,386

Channels

17

BrightTV currently has: 10,000 total subscribers, 4,386 active subscribers and 17 available channels

Only 43.9% of subscribers are actively consuming content, leaving more than half of the subscriber base inactive. This represents the biggest opportunity for subscriber growth without acquiring entirely new customers.

Understanding Daily Screen Time Distribution as a Factor of Subscriber Age

Screen_Time_By_Age_Bracket

	Age_Group	Age_...	duration ▾
1.	Youth	20-35	1,384
2.	Adult	36-50	985
3.	Elder	51-65	267
4.	Teenager	13-19	248
5.	Infants	0	182
6.	Kids	1-12	88
7.	Pensioner	+65	43
1 - 7 / 7			< >

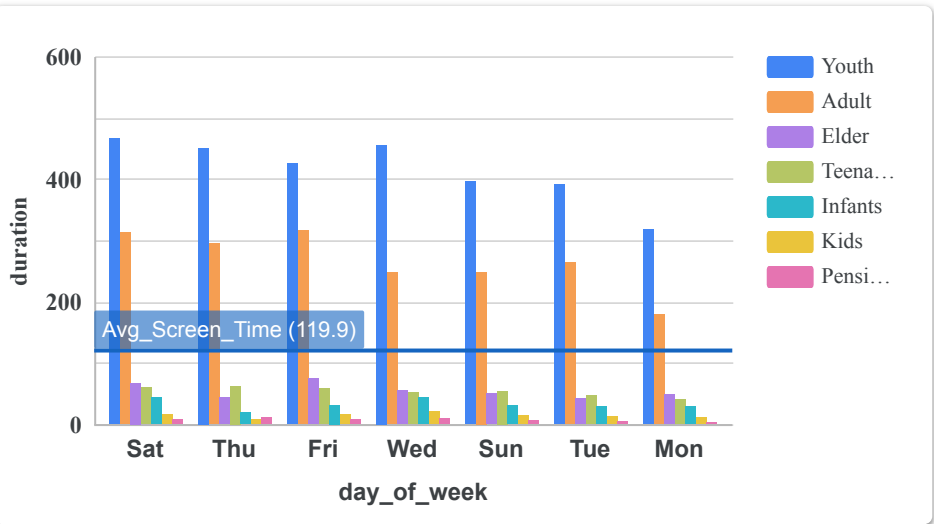

Daily_Screen_Time by Age

Screen time is primarily distributed between the Youth and Adult Age segments.

On a daily basis, Youth and Adults are the primary viewers, consistently watching for longer hours than the average duration.

Pensioners consistently have the lowest screen time on a daily basis.

Daily_Screen_Time_By_Age_Group

Age Drives Consumption:

Insight:

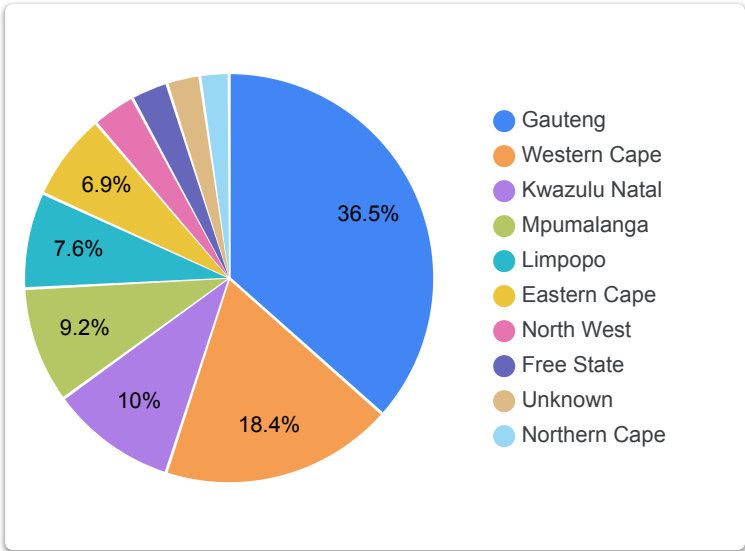

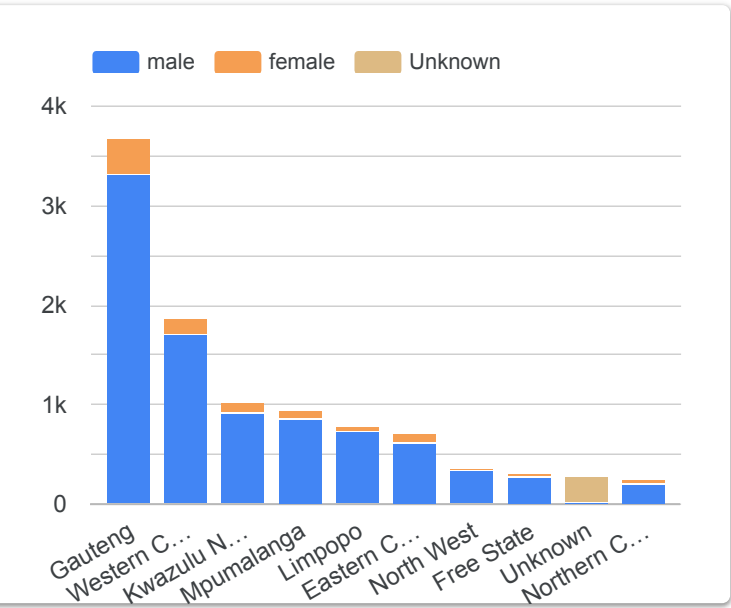

- Young adults are the core customer segment. They generate most viewing hours.
- This means BrightTV should optimise content primarily for this audience.
- Afternoon viewing sessions are the longest, while evening sessions are surprisingly shorter.

Recommendation:

- Increase investment in:
- Sports Reality TV
 - Music
 - Live entertainment
 - Trending local content

Understanding Viewership by Region

Regional Viewership segmented by Gender

Viewership Distribution by provinces

Across all provinces, males consist of the largest subscribers and viewers of the content.

Females in Gauteng have the largest viewership.

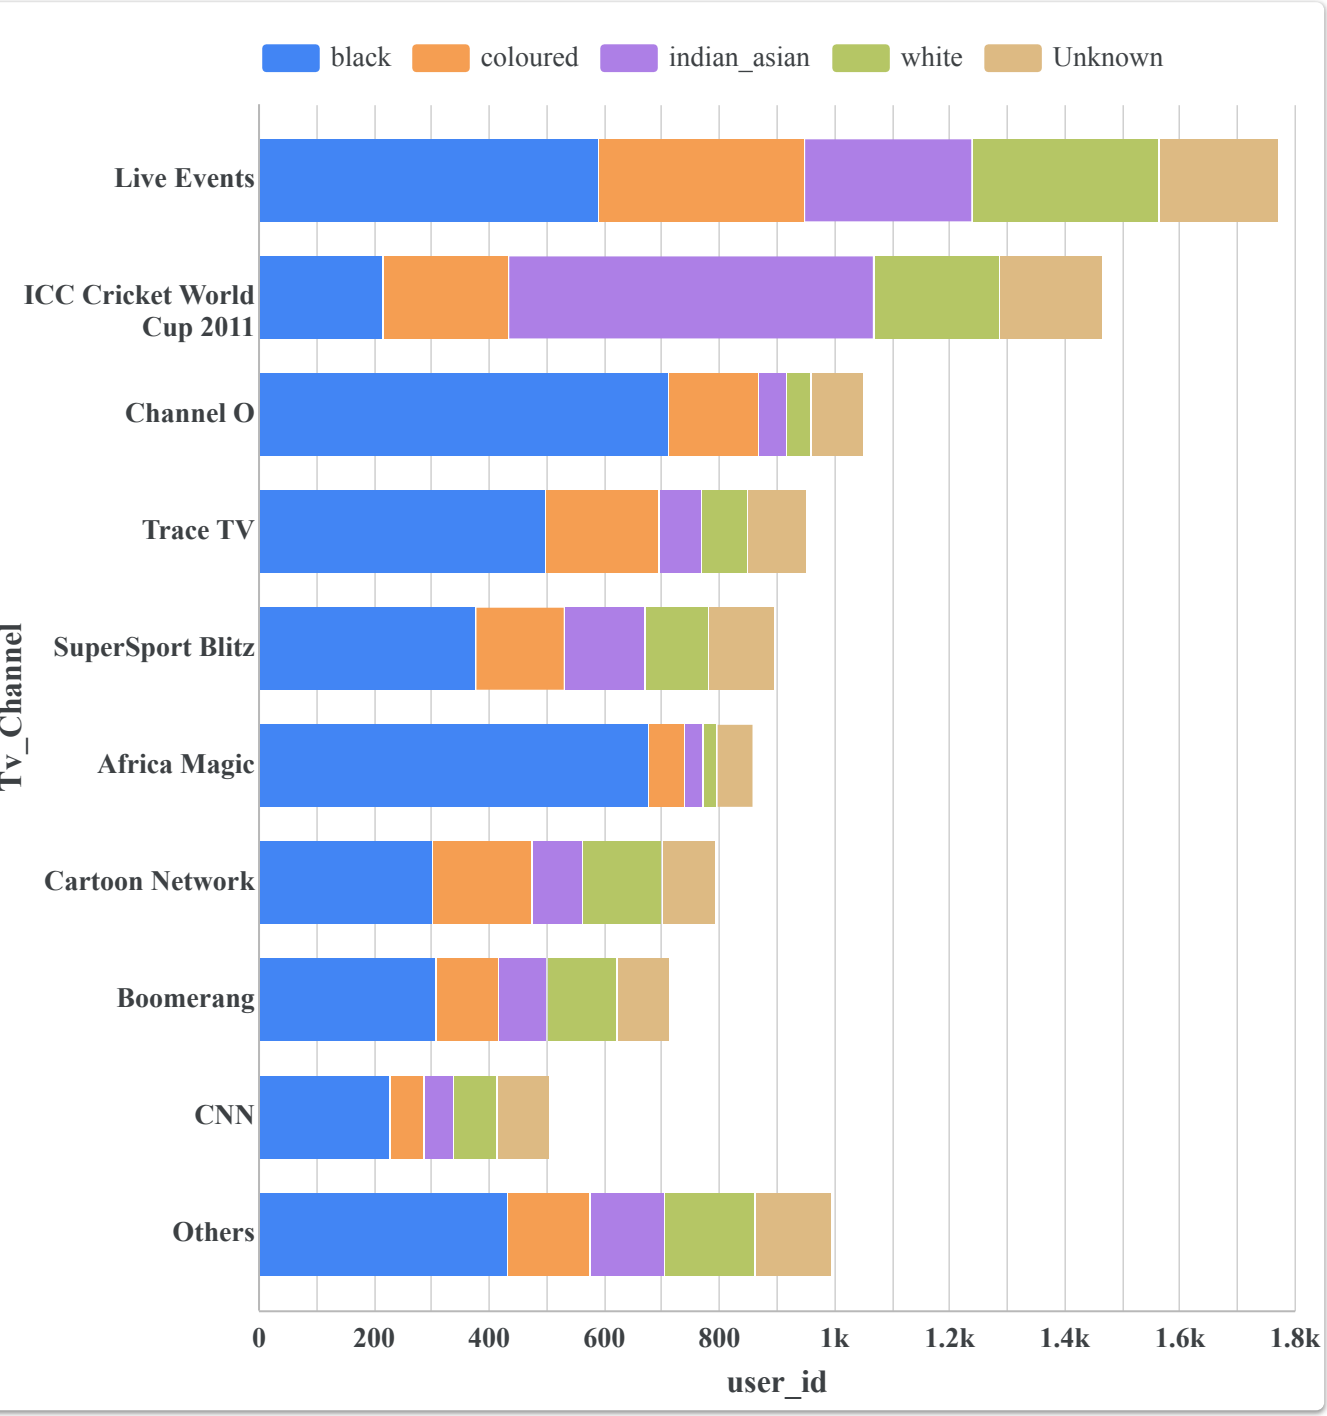

Gauteng has the highest viewership, followed the Western Cape.

Gauteng and Western Cape consist over 50% of the BrightTV viewership.

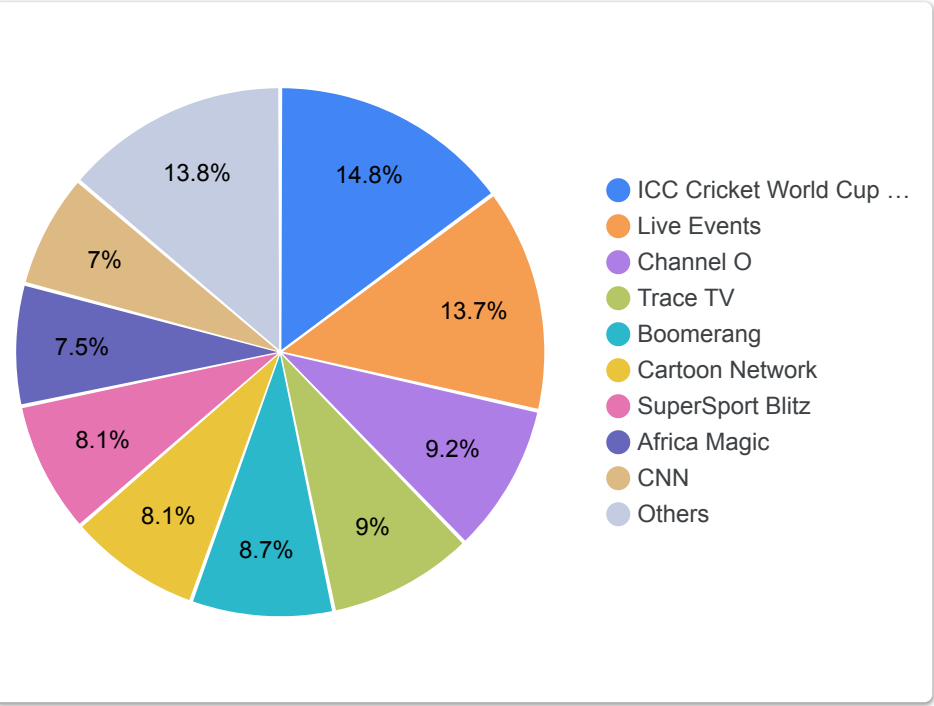

Neighboring provinces (i.e. Northern Cape, North West and Free State) consist of the lowest viewership concentration.

Understanding Viewership by Demographics and Channels

Demographic distribution of channel viewership

Channel Distribution by duration watched

Screen time per channel segmented demographically

- Black Africans comprise of the highest viewer audience on approximately 90% of the channels.

- The Live Events channel(s) engage the largest number of users across all ethnicities.

- Live Events and ICC Cricket World Cup 2011 cater for almost 30% of screen time on BrightTV.

- Screen time is relatively fairly distributed across the various channels.

Marketing investment should not be spread equally across South Africa. It should focus where BrightTV already has strong traction.

The channels with the highest viewing comes from:

Live Events, ICC Cricket World Cup, Channel O, Trace TV, and SuperSport Blitz Together.

Business implication:

Live content attracts viewers. People are willing to watch events as they happen.

Recommendation:

Acquire additional rights for: PSL football, Rugby, Boxing, Music concerts Award shows and eSports tournaments
These events create urgency because viewers cannot watch them later without missing the experience.
